

Our Ingredients

Our Gluten Free promise...

At Stokes, we ensure ingredients are clearly listed on the label of our products to clearly state where ingredients contain or are derived from cereals containing gluten, such as barley and wheat.

Quick guide to our Gluten Free

The following products from our range contain gluten, at levels that could be above 20 parts per million (ppm):

- Beer Chutney – Beer (barley)
- Sweet and Sticky BBQ – Malt Vinegar (barley), Soy Sauce (wheat)
- Hoi Sin Sauce – Soy Sauce (wheat)
- Korean BBQ Sauce – Soy Sauce (wheat)

The following list of products from our range contain gluten derived ingredients, but the level of gluten in the overall product is below 20 parts per million (ppm) and can therefore be classified as 'gluten free' (This is based on information from ingredient suppliers and finished product testing):

- Coronation Sauce – Malt Vinegar (barley)
- Tartare Sauce – Distilled Malt Vinegar (barley)
- BBQ Sauce – Malt Extract (barley)
- Brown Sauce – Malt Vinegar (barley)
- Hot & Spicy BBQ Sauce - Malt Extract (barley)

If barley is used in a food product, the word 'barley' must be listed and emphasised in the ingredients list, in line with food labelling law.

Most of the gluten in Malt Vinegar and Distilled Malt Vinegar is removed by the manufacturing process. The amount of barley left, and therefore gluten, in the end vinegar is extremely small, below 20 parts per million (ppm), which is a safe level of gluten for people with coeliac disease. This level is even smaller in Stokes finished product.

Spirit Vinegar does not contain any gluten.

Procedures are in place to eliminate cross contamination from gluten containing raw materials and products.
